DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed July 23, 2002.

Claim 1 was amended and claims 1-5 pending.

Claim Rejections – 35 USC 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "a plurality of one of crystalline and amorphous first material layers" is indefinite. It is unclear whether or not the first material layers comprises crystalline or amorphous material or both. The claim language is ambiguous and clarification is requested.

Claim Rejections – 35 USC § 103(a)

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1774

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saaski et al. (U.S. 4,778,987) in view of Fischer (U.S. 5,929,633) for the reasons set forth in paragraph 3, in the previous office action, mailed January 17, 2002.

Response to Arguments

6. Applicant's remarks to 35 USC 103(a) as being unpatentable over Saaski et al. (U.S. 4,778,987) in view of Fischer (U.S. 5,929,633) have been considered but are unpersuasive. Applicant argues the Saaski reference concerns an optical measuring device and claim 1 is directed to a scale for technical devices which are used for high-resolution or ultrahigh-resolution imaging of structures, which is directed to intended use. In response to applicant's argument that [1], a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Applicant further argues the Saaski reference does not teach or suggest a plurality of one of crystalline and amorphous first material layers and a plurality of one of crystalline and amorphous second material layers. This argument is moot due to its reliance on the amended claim, which was rejected on grounds of indefiniteness under 35 USC 112, second paragraph. Applicant argues the Saaski reference does not disclose chrome being crystalline. In

Art Unit: 1774

response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Fisher was used to teach crystalline chrome layers within a measuring device. Applicant argues Fisher is not a proper prior art because it has a priority of November 29, 1996 where the present application is a divisional filed on February 6, 1997 and has priority filed on February 7, 1996. The February 6, 1996 priority claimed is duly noted but rendered irrelevant because Applicant has failed to submit a certified copy of the prior art, supporting the priority of the admitted priority documentation.

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
